

We already have enough sexual and violent content on television today as it is. I don't even have children, but I fear for the safety and future problems our countries children and my future will face with increasing sexual content, abusive language, and violence television displays. If any increase in sex, violence, or foul language happens I will disconnect my cable completely and just not watch anything. I'd rather be negligent then have my family and my mind filled with this sin. Nothing good comes from this for community. This impact will negatively affect millions of people. We already have had an increase in sexual crimes, which is a direct result from the sex people see on television. I strongly oppose the change of allowing more sexual content during peak hours when children will be watching.
